

Submission to NABERS in relation to Position Paper

“Proportioning of Energy used by Cogeneration or Trigeneration Systems”

24th August 2012

Urban Energy Submission to NABERS in relation to Trigeneration Rating consultation

Issue 1

Urban Energy supports the NABERS position as drafted.

Issue 2:

Urban Energy supports the updated NABERS position as drafted.

Issue 3:

Urban Energy supports the NABERS position as drafted.

Issue 4:

Urban energy supports the development of a national standard dealing with the supply of low emissions electricity and heat as opposed to the current recommendation to deal with each instance on a case by case basis.

Issue 5:

Urban Energy supports the provision of clearly understandable information in relation to the emissions intensity of electricity through both the rating Certificate and the Rating report. We recommend an explanatory note be attached to each report issued under this provision.
